PROFESSIONAL SUMMARY

Fullstack Developer specializing in modernizing applications through intuitive, high-quality user experiences. Strong in end-to-end development, UI/UX design, API integration, authentication systems, and performance optimization. Experienced in translating complex operational workflows into streamlined, user-centric solutions in collaboration with SAP, backend, and cross-functional teams.

EXPERIENCE

Staff Programmer (Fullstack Developer) — Charoen Pokphand (2024–Present)

- Reduced SAP processing time by 30–60% through workflow automation
- Built and maintained enterprise systems used in factory operations
- Coordinated across SAP, backend, WMS, and factory teams
- Designed UI/UX and implemented role-based authentication systems

Freelance Web Developer (2023–Present)

- Delivered 10+ projects including international clients
- Built modern, high-performance websites with strong UI/UX focus
- Led client meetings and handled deployment end-to-end

PROJECTS

Prodsys — Factory Scale System

- Fullstack system integrating multiple databases and real-time scale data
- Improved factory throughput and reduced production delays through optimized workflows
- Processes 5,200+ records with planned nationwide multi-factory expansion

ESupply — Supplier Portal

- Platform managing 4,200+ production orders and documents
- Optimized performance for large datasets and external APIs
- Implemented authentication and user role management

SKILLS

Frontend: React, Next.js, TypeScript, Tailwind, Zustand, GSAP

Backend: GraphQL, Apollo, PostgreSQL

Tools: VS Code, DBeaver, PuTTY, WinSCP

Other: Sanity CMS, API Integration, Authentication Systems, UI/UX Design

Language: English (fluent/native), Bahasa Indonesia, Chinese (Elementary)

EDUCATION

Bachelor of Software Engineering — Shandong University of Science and Technology (2023)
